

capabilities brochure for modified enclosures

ETA

INNOVATIVE ENCLOSURE SOLUTIONS FOR INDUSTRIAL & ELECTRONIC APPLICATIONS

as your requirements change
so do our capabilities

When our standard range of enclosures doesn't meet with your application, ETA will work with you in developing a product that best suits your requirements. Standard ETA products can be modified quickly and cost-effectively using our advanced machinery technology including rapid hole punching and laser cutting technology.

Using our modification services, you can select from 100's of standard products and apply holes and cut-outs, special brackets and alternative paint colours and finishes. Our modified enclosures offer the same quality as you'd expect from our standard products.

UK customers can learn more about our modified capabilities by logging onto www.eta-enclosures.co.uk or call our sales office for further information.

For international customers, you can visit www.eta.it for more information.

what you need when you need it

— painted mild steel boxes —

- Assembly of optional accessories including mounting plates/sides/plinth bases/swing out rack frames
- Cut-out preparation for fans and filter assemblies
- Alternative paint colours and finishes

For ETA, modifying standard enclosures is as easy as ABC...

- For UK customers log onto www.eta-enclosures.co.uk and send us your requirements. For international customers, you can visit www.eta.it for more information.
- We will respond within 24hrs with pricing/drawings and delivery times.
- In 15 working days your modified product is ready to ship.

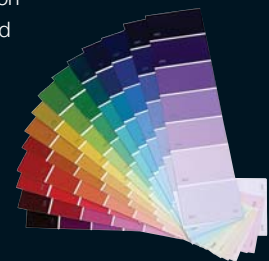

Our modified enclosure programme is not only restricted to painted Mild steel boxes, ETA can apply modifications to most of it's enclosure programme. Please refer to the boxes and see which products are available.

Large quantities are not always necessary

Some products have minimum ordering quantities [MOQ] but in most cases we can work with you based on your actual requirements and provide a scheduled delivery service for on-going requirements.

Colour options and finishes

We understand your requirements might require alternative paint colours and finishes that's why we provide a vast range of optional colours and finishes. Based on the RAL colour, our advanced automatic paint systems provide for a fast turnaround.

Our ETA-CAD software package will assist with your requirements

Our ETA-CAD software package has achieved huge popularity over the years as a tool that's easy to use in developing customer specific changes to ETA products. With "click and drop" features you can apply a host of standard changes from a vast library of manufacturer's components including push buttons, meter cut-outs and isolator switches.
